

METHOD, SYSTEM AND PROGRAM PRODUCT FOR RESOLVING WORD  
AMBIGUITY IN TEXT LANGUAGE TRANSLATION

Abstract of the Disclosure:

This invention discloses a computer translation method and  
5 system for resolving word ambiguity. During translating a text in  
a first language, checking whether or not the word to be  
translated or the sentence containing the word has additional  
related text that is associated by a linkage. When the meaning  
of the word can not be uniquely determined in a second language  
10 by analyzing the context than the related text is obtained  
according to the linkage and the word is translated using both  
the immediate text and the related text. The linkage mechanism is  
described as a hyperlink in a HTML document.
